2022-2023
Educator’s Guide

We grow minds, too.
WELCOME EDUCATORS!

What better place to connect students with nature and science than at The Dallas Arboretum and the one-of-a-kind natural wonder Rory Meyers Children’s Adventure Garden, featuring 17 interactive STEM-focused galleries with over 150 kid-friendly exhibits to educate and inspire. We are excited to welcome you to the garden to explore all of the educational opportunities we offer in life and earth sciences.

Choose from a variety of guided programs throughout the Children’s Adventure Garden, including our renowned Texas Native Wetlands and OmniGlobe. Or, attend one of our guided classroom or outdoor labs in the Main Garden, all of which are standards-aligned and led by our highly-trained staff. In addition, we are proud to offer a full lineup of outreach programs, afterschool residencies and academic overnights to engage your students in the Rory Meyers Children’s Adventure Garden after hours!

Teachers, did you know that we also offer a full range of professional learning with both in person and online options? We are happy to offer customized learning for groups of 15 or more as well.

Parents, if your 3rd-6th grade children need help with the most difficult life and earth science concepts, please contact us. We offer a science learning series designed to boost science achievement and increase access to hands-on science.

We are more than just a beautiful garden ... We grow minds, too!

Did you know?

All teachers receive free admission year round to plan their field trips and create content for their classrooms!

We also serve scout, afterschool and homeschool groups with custom programming including workshops, outreach and badge programs.

KNOW BEFORE YOU GO

• Add education@dallasarboretum.org to your safe senders list!
• Make sure you know whether your group is arriving to the Children’s Adventure Garden (Gate 3 and Gate 4) or Main Garden (Gate 1).
• Students must be with an adult at all times at a ratio of 8:1.
• Bring labeled containers for lunches. Wheeled coolers work best as we are unable to provide assistance.
• Plan to be outdoors – wear walking shoes and raincoats/jackets, if appropriate.
• Arboretum-led programs: We provide your program times, but please group your students and assign chaperones before arrival to the Arboretum.
• We send a standards-aligned pre- and post- visit resource guide for every program.

12 THANKS TO OUR DONORS
SEASONAL PROGRAMS
K–2nd Grade
PUMPKIN CIRCLE
AVAILABLE SEPTEMBER 19 – NOVEMBER 4
After distinguishing between living and nonliving things, students explore the basic needs, parts and functions of pumpkin plants. Students discuss the life cycle of a pumpkin and plant their own seeds to take back to school for observation. Compliment this program with a walk through the Arboretum’s Pumpkin Village.

CHRISTMAS VILLAGE GUIDED TOUR
AVAILABLE NOVEMBER 10 – DECEMBER 16
Take a trip around the world this winter without leaving Texas! Explore the Arboretum’s new Pauline and Austin Neuhoff Family Christmas Village while students learn about winter traditions from across the globe that have found their way to Texas. Discover traditional food and music as well as cultural meanings of winter flowers and plants from our state and beyond. Connect with your favorite winter traditions this year at the Dallas Arboretum.

SEEDSATIONAL
AVAILABLE FEBRUARY 27 – MAY 26
In this lab, students will discuss characteristics of living things and use those characteristics to differentiate between living and non-living things. They will explore the life cycles of plants, learning about the different ways seeds travels. Students will then observe seeds inside a cantaloupe and compare cantaloupe seeds to a variety of other seeds. Students will dissect a lima bean seed, discuss how a new plant grows from a seed, and then plant their own seed for continued observation at home.

NATURE’S WORKS OF ART
3rd–6th Grade
AVAILABLE ALL YEAR
The beauty and wonder of trees and flowers have enchanted artists for centuries. In this Arboretum educator-led program, students explore color, shape and texture in nature and investigate the artistic skills used in a variety of jobs at the Arboretum.

OUR PLACE AT YOUR PACE
RESERVE A SELF-GUIDED VISIT FOR YOUR EDUCATIONAL GROUP THAT BRINGS SCIENCE TO LIFE IN OUR AMAZING, INTERACTIVE GARDEN. RESERVATIONS INCLUDE A PRE- AND POST-VISIT RESOURCE GUIDE AND ACCESS TO OUR ENTIRE MAIN GARDEN. CHILDREN’S ADVENTURE GARDEN ACCESS AVAILABLE AT ADDITIONAL COST.
LEARNING GALLERY PROGRAMS
RESERVE AN INSTRUCTOR-GUIDED GALLERY PROGRAM THAT BRINGS SCIENCE TO LIFE IN OUR AMAZING INTERACTIVE OUTDOOR MUSEUM AND GARDEN. RESERVATIONS INCLUDE PRE-AND POST-VISIT RESOURCE GUIDES AND ACCESS TO OUR ENTIRE GARDEN. ALL CONTENT IS TEKS-ALIGNED FOR YOUR SPECIFIC GRADE LEVEL NEEDS. RESERVE NOW! THE CHILDREN’S ADVENTURE GARDEN IS CLOSED JANUARY 1-FEBRUARY 18.

HABITATS

TREE TREK 3RD–6TH GRADE
Trees are amazing! How do many of these giant plants outlive humans? Students will discover the science of studying a tree, through hands-on activities, and investigate what these organisms need to live a long life in a woodland ecosystem. Students walk through the Discovery Trail Loop to explore how trees provide shelter and food to other organisms and discover how trees are adapted to survive in changing habitats.

LIVING CYCLES 3RD–5TH GRADE
Explore the growth and change of a diverse set of organisms. Students compare the physical appearance of adults and offspring to assess how plants and animals change over time and investigate pollinators and their role in life cycles. In the gallery, students identify and observe the roles of decomposers, methods of seed dispersal, organisms in different stages of their life cycle and the process of pollination.

KALEIDOSCOPE 3RD–6TH GRADE
Explore how science is the study of natural patterns and how humans make use of these patterns. Students first identify patterns regularly found in nature and then investigate how patterns can be analyzed with math by looking at the Fibonacci sequence. Students then explore the gallery and quantify the most commonly observed shapes in plants. Next, they discuss how shapes are adaptations and how humans have used natural shapes as inspiration for our designed world.

PURE ENERGY 4TH–6TH GRADE
In this program, students develop a new understanding of alternative energy sources and the transfer of energy. Students first discuss forms and sources of energy and work together to create a living circuit. Then, small teams explore the water, solar and wind islands to record data on these three sources of renewable energy.

THE GLADE PRE K–FIRST GRADE
The Glade is home to our puppet theater that invites guests to enjoy fun songs, dramatic characters and educational tales inspired by happenings in nature. The Glade is a natural space where visitors can take a seat and become part of the stories presented by our educators and puppeteers. After the show the stories come to life in the plants, animals, and insects found throughout the garden.

LITTLE SPROUTS SQUIRREL ADVENTURE
Help Nuts the Squirrel find a new home! This interactive outdoor program focuses on the changing seasons and animals’ habitat needs. Students listen to a big book story about the life of a squirrel and engage with characters in an outdoor puppet show. [Offered August-December]

LITTLE SPROUTS BUTTERFLY ADVENTURE
What will happen to Cathy Caterpillar? This fun, interactive program brings metamorphosis to life with a big book story about the butterfly life cycle and an outdoor puppet show. [Offered March-June]
TEXAS NATIVE WETLANDS 3RD–6TH GRADE
How healthy is our habitat? In this program, students explore our Texas Native Wetlands and collect data from our outdoor, island classroom. Students make connections between the living and nonliving parts of the ecosystem to determine the health of our waterway using cutting-edge scientific tools.

INCREDIBLE EDIBLE 3RD–6TH GRADE
Which foods provide us with the most energy? How much of our plates should be fruits and vegetables? Where do we get our food? In this program, students explore healthy food choices, uncover where food comes from and investigate new techniques currently used in urban farming.

MOODY OASIS
MONARCH MANIA 3RD–6TH GRADE
Texas is a prime spot to observe monarch butterflies—it lies between the breeding grounds to the north, in Canada, and the overwintering areas to the south, in Mexico. Our certified Monarch Waystation is the perfect place to observe monarchs and many other pollinators. In this program, students learn all about the fascinating life of the monarch butterfly and what they can do to help them survive. Students may even spot monarchs in the garden! [Peak times are typically early October and late March.]

PATH TO POLLEN 3RD–6TH GRADE
Are insects our friends or foes? Are they all pests? No! 75% of all flowering plants need animal pollinators. This includes the majority of the plant foods in our diet. In this program, students learn about the important relationships between plants and pollinators and how each are adapted to benefit from one another.

EARTH CYCLES
EARTH FROM SPACE 3RD–6TH GRADE
Life on Earth is dominated by regular and repeating patterns. In this program, students learn all about the relationships between the seasons, moon phases, shadows and planets through hands-on demonstrations and a focused student activity in the gallery. If you’ve been struggling to show the connections between these topics, this is the class for you!

DYNAMIC EARTH 4TH–6TH GRADE
The Earth is always changing. Weathering, erosion, deposition and the movement of tectonic plates cause slow and rapid changes to the Earth’s surface. In this program, students participate in hands-on inquiry with actual rock samples and observe natural processes of change at our interactive stream table. A focused activity helps students discover the dynamic, natural world as they explore the gallery. Bring Earth science to life in our outdoor learning lab!

OMNIGLOBE
PLANETARY VOYAGE 3RD–6TH GRADE
Travel through the solar system and beyond in our Globe Theatre. During this program, students view 360-degree imagery of the planets through NASA satellite views projected from our five-foot-tall OmniGlobe. They discover what makes each planet unique, including our irreplaceable planet, Earth. This captivating program ensures high student engagement as they become the experts on a wide range of science topics.

POWERFUL OCEANS 3RD–6TH GRADE
Earth’s oceans play an incredible role in creating and regulating weather, climate and other vital environmental systems. In this program, students discover these powerful bodies of water from an astronaut’s perspective on the largest OmniGlobe in Texas! As students observe animated ocean currents, hurricanes and real-time weather patterns from satellite data projected from our five-foot sphere, they explore why organisms across our planet depend on the health of the oceans.
**CLASSROOM LABS & OUTREACH PROGRAMS**

**CLASSROOM LABS**
RESERVE AN HOUR-LONG CLASSROOM LEARNING EXPERIENCE HELD AT THE VISITOR EDUCATION PAVILION OR OUTDOORS IN THE MAIN GARDEN TO EXPLORE A VARIETY OF LIFE AND EARTH SCIENCE TOPICS. RESERVATIONS INCLUDE ADMISSION TO THE MAIN GARDEN AND CHILDREN’S ADVENTURE GARDEN.

**OUTREACH: GARDEN ON THE GO**
LET US BRING OUR LEARNING EXPERIENCES TO YOUR SCHOOL! BOOK A GARDEN ON THE GO PROGRAM TO BRING ANY OF OUR ENGAGING LABS TO YOUR CAMPUS. PROGRAMS CAN ACCOMMODATE UP TO 30 STUDENTS PER SESSION. BOOK NOW!

---

**GARDEN DESIGN CHALLENGE 3RD-6TH GRADE**
What environmental factors and landscape design choices must our horticulture staff consider when designing our seasonal plantings? In this multi-disciplinary lab, students work with actual Arboretum plant lists and design notes to create a landscape in the garden. Follow up the class with a visit to the space students just designed! [Only offered on-site] 🌿

**DIVING INTO PHYSICAL PROPERTIES 3RD GRADE**
How do our actions in North Texas contribute to the issue of marine debris? In this lesson students will explore how trash enters our waterways and ultimately flows to the ocean. They will then investigate an issue closer to home by making observations of a collection of objects that fell into one of the Arboretum’s water features. After determining the physical properties of each object, students will advise Arboretum staff on the best tool to use to retrieve each object. 🌊

**ENERGY IN THE GARDEN 3RD GRADE**
How can we use different forms of energy to solve problems that arise in a garden? After exploring, describing and identifying four forms of energy (mechanical, light, thermal and sound) in everyday objects, students are presented with garden scenarios. They are then challenged to design strategies to address the problems using different forms of energy. ☀️

**IT’S A BUG’S LIFE 3RD-5TH GRADE**
The Arboretum is home to hundreds of plant and animal species, including many bugs! In this program, students identify ‘bug’ as an informal name given to terrestrial arthropods and observe live organisms to identify the traits that make insects different from other arthropods. Students look closely at various arthropod adaptations that support survival in different environments and investigate the unique life cycles of different organisms. 🐜

**RESTLESS EARTH 3RD-5TH GRADE**
Every place has a story. In this lab, students explore the slow processes that create geological change: weathering, erosion and deposition. 3rd and 4th grade students investigate how these processes lead to the formation of soils and use this information to explain why soils have different properties. 5th grade students identify how these processes lead to the formation of landforms and use this information to explain why certain places look the way they do and predict how areas could change in the future. ⚗️

**DISAPPEARING ACT 3RD-6TH GRADE**
What happens when an organism in an ecosystem disappears? Students first investigate three organisms: white-tailed deer, post oak trees and grey wolves. They create a model of the Post Oak Savannah to actively simulate how the local extinction of wolves in this area affects all components of the ecosystem. Each student acts as either a wolf or a deer in this engaging, interactive lab. 🦌

---

**Did you know?**

*Program results show significant growth in student STAAR success over their district peers!* 😊

*Student documents and assessments available in English and Spanish.* 📚

*These inquiry-based programs cover topics in all four reporting categories and even include access to STAAR-style pre/post questions.* 🌈
A TOUR OF TEXAS: EXPLORING ENVIRONMENTS ACROSS OUR STATE 3RD GRADE
Experience the diversity of life across our state! Students will first observe the characteristics of three different Texas environments: Caddo Lake State Park, Blackland Prairie and Big Bend National Park. Students will then observe adaptations of various plants and animals and identify the environment where specific organisms would best survive.

RAPID CHANGES 3RD GRADE
How do volcanoes, earthquakes and landslides impact Earth's surface? Students explore images that show the aftermath of volcanoes, landslides and earthquakes. Then they use models to further investigate these geological processes. Students are challenged to describe a strength and weakness of each model.

MODELS: SUN, EARTH & MOON 3RD GRADE
Take a bird's-eye view of space! Students first create a human-sized model to demonstrate the relative positions of the Sun, Earth and Moon and the orbits of the Earth and our Moon. Then, they use 3D printed models to demonstrate the same concepts, in a different way. Finally, students are challenged to create their own 2D model to demonstrate their understanding.

LIFE CYCLES 3RD GRADE
Let us bring our live organisms to you! In this lesson students will make observations of four different arthropods at various stages in their life cycles and identify similarities and differences in how these organisms change over time.

MATTER OVER TIME 4TH GRADE
What happens to our trash over time? In this lab, students first measure and record physical properties of a “fresh” piece of trash. Then, they measure and record the physical properties of that same type of trash that has been buried in soil for multiple weeks. Students use this data to discuss what happens to trash in a landfill and discuss what we can do to reduce the amount matter that is added to landfills.

PICKLE POWERED 4TH GRADE
Can a pickle light a lightbulb? First, students differentiate among forms of energy, including mechanical, electrical, light, thermal and sound. Then, they identify these various forms of energy in electrical circuits and experiment with building a pickle battery, creating a circuit which powers a lightbulb.

STORIES FROM THE SOIL 4TH GRADE
What do properties of soils tell us about the environments they came from? Students will first examine properties of soils from different areas, including color and texture, capacity to retain water and ability to support the growth of plants. Students will then use what they learned to investigate and identify where a mystery soil sample came from.

EARTH’S WATER CYCLE 4TH GRADE
In this lab, students will move through 5 stations to investigate various components of the water cycle. They will identify how models can be used to represent natural phenomena and explore the sun’s role in the continuous movement of water above and on the surface of Earth.
GARDEN ART 5TH GRADE
How does light travel? In this lesson, students will first complete three investigations to explore how light travels in a straight line and changes direction when reflected or refracted. They will then be challenged to use what they learned about light to design a prototype of an art piece for the Dallas Arboretum.

LANDFORM FORMATION 5TH GRADE
Why does the surface of Earth look the way it does? First, students observe images of landforms from around the globe. Then they use stream tables to investigate and describe how wind, water and ice contribute to the formation of sand dunes, valleys, canyons and deltas.

EXPLORING DAY AND NIGHT 5TH GRADE
Why do we experience day and night? First, students make observations of a time-lapse video of the setting sun. Then, they experiment with two different models and construct an explanation based on direct and indirect evidence, to explain the cause of the day and night cycle.

ECO FLOW 5TH GRADE
Our arthropod collection will travel to you! In this lab, students observe live tarantulas, walking sticks, pill bugs and beetles in their habitats and identify interactions between living and nonliving components in these ecosystems.

AMAZING ADAPTATIONS: PLANTS 5TH GRADE
After reviewing the basic structures and functions of plants, students work through three stations to observe and describe a diverse selection of leaves, stems and roots. Students then learn about different Texas environments and infer, based on their observations, which plant grows best in each environment.

ALL ABOUT ANTS! TRAITS AND BEHAVIORS
Let us bring our ant farm collection to your classroom! In this lab, students explore and describe inherited traits and learned behaviors while observing live ants. First, students observe and identify the inherited traits ants share with all insects and those traits that make ants unique. Then, they discuss the behaviors of these social insects and identify the difference between instinctual behaviors and learned behaviors.

ECOSYSTEMS IN ACTION 4TH GRADE
What happens when the top predator leaves an ecosystem? In this lab, students identify the physical characteristics and ecological roles of 5 organisms: red wolves, post oak trees, turkey vultures, white-tailed deer and earthworms. Then, they create a food web to show how energy flows through this ecosystem. Finally, students play a game to explore how the local extinction of the red wolf in the eastern half of Texas impacts the entire food web.

SORTING OUT MIXTURES 5TH GRADE
What is a mixture? In this lab, students will first identify the differences between heterogeneous mixtures and solutions. They will then work in groups to create mixtures from a collection of beads and make observations of the physical properties of the mixture as compared to the physical properties of the ingredients. Finally students will explore soil as a mixture and investigate the ingredients that make up soil.

EXPLORING DAY AND NIGHT 5TH GRADE
Our ant farm collection will travel to you! In this lab, students observe live ants. First, students observe and identify the inherited traits ants share with all insects and those traits that make ants unique. Then, they discuss the behaviors of these social insects and identify the difference between instinctual behaviors and learned behaviors.

ECOSYSTEMS IN ACTION 4TH GRADE
What happens when the top predator leaves an ecosystem? In this lab, students identify the physical characteristics and ecological roles of 5 organisms: red wolves, post oak trees, turkey vultures, white-tailed deer and earthworms. Then, they create a food web to show how energy flows through this ecosystem. Finally, students play a game to explore how the local extinction of the red wolf in the eastern half of Texas impacts the entire food web.

SORTING OUT MIXTURES 5TH GRADE
What is a mixture? In this lab, students will first identify the differences between heterogeneous mixtures and solutions. They will then work in groups to create mixtures from a collection of beads and make observations of the physical properties of the mixture as compared to the physical properties of the ingredients. Finally students will explore soil as a mixture and investigate the ingredients that make up soil.
AFTERSCHOOL
INVITE THE DALLAS ARBORETUM TO YOUR SITE TO MAKE AFTERSCHOOL A FUN AND ACTIVE LEARNING EXPERIENCE. THESE HIGHLY INTERACTIVE INDOOR AND OUTDOOR CLASSES ALLOW STUDENTS TO EXPLORE NATURE BEYOND THE CLASSROOM WALLS. WE OFFER CUSTOM PROGRAMMING TO FIT YOUR ACADEMIC NEEDS – AND WE’LL SHOW STUDENTS THAT NATURE IS ALL AROUND THEM, EVEN IN THE SCHOOLYARD!

PROGRAM DETAILS
Programs offer a 7-week unit consisting of one weekly 90-minute lesson. Email education@dallasarboretum.org for program options.

OUTDOOR CLASSROOM SUPPORT
NEED SUPPORT WITH YOUR OUTDOOR GARDEN OR OUTDOOR LEARNING SPACE? LET US PARTNER WITH YOU TO GET THE MOST OUT OF YOUR GARDEN. INTERESTED BUT DON'T HAVE A GARDEN SPACE? CONSIDER CONTAINER GARDENING OR CHECK OUT OUR GARDENING WITH HYDROPONICS TO CONNECT KIDS TO SCIENCE LEARNING IN THE REAL WORLD!

PROGRAM DETAILS
Prices are based on 1-2 hours per month over 3 months, totaling 6 hours of professional development. Visit dallasarboretum.org/education for more details about available options and pricing.

ACADEMIC OVERNIGHTS
SCHOOL OVERNIGHTS ARE THE PERFECT OPPORTUNITY TO EXPLORE SCIENCE CONTENT IN THE RORY MEYERS CHILDREN'S ADVENTURE GARDEN OUTSIDE OF SCHOOL HOURS!

Make your next school event a night of fun, hands-on learning and memories in the Rory Meyers Children's Adventure Garden! Students will have the garden to themselves as they participate in unique earth and life science classes, as well as travel through the solar system in our OmniGlobe Theatre, explore the gardens in a flashlight night hike and stargaze with experienced Arboretum staff. Our programming even builds in opportunities for STARR-style review of content learned. Your students will be having so much fun they won't realize how much they're learning. A light snack, continental breakfast, parking and next day garden admission are all included. Overnights are perfect for grade levels or club events! To request a date, please contact us at education@dallasarboretum.org
RESERVATION POLICIES

ADMISSION
All on-site Arboretum educator-led field trips include access to the Children's Adventure Garden for K-8th grade from March-December. Self-guided field trips do not include access to the Children's Adventure Garden. Access to the Children's Adventure Garden can be added to self-guided field trips for an additional fee for grades K-8. The Children's Adventure Garden is closed January 1-February 24.

Please note: A Tasteful Place and the DeGolyer House are not open to school groups. We kindly ask you notify parents/chaperones to avoid these areas.

PROGRAMS AND PRICING
All Arboretum teacher-led field trips cost $12 per student with access to the Children's Adventure Garden for K-8 students included at no additional cost. Self-guided programs cost $12 per attendee with a $3 additional fee to add access to the Children's Adventure Garden. Program availability and pricing are subject to change.

Outreach programs outside of Dallas County are subject to a travel fee. Most programs are eligible for Learning Partners funds for DISD schools. Visit our Education website for the most current program pricing and travel fees.

CHANGES, PAYMENTS AND REFUNDS
A 50% non-refundable deposit is required at the time of reservation confirmation by the Education Department. Final payment is due 30 days prior to scheduled visit date. If not paying in full at the time of the reservation, please plan to have payment mailed in advance to ensure it arrives by the due date. Credit card payments accepted.

Programs reserved less than 30 days in advance of booked date require full payment upon reservation confirmation, of which 50% will be non-refundable. If payment is not made by due date, we reserve the right to open your booked reservation dates and class times to others.

No refunds except in the event of garden closings due to inclement weather or other issues deemed serious enough by the Dallas Arboretum to warrant cancellations. The Arboretum does not issue refunds or tickets for absent group members nor will it make adjustments to the attendance number past the time of booking confirmation, except to add additional tickets as needed.

If you need to reschedule or cancel your reservation, you MUST email Reservations at education@dallasarboretum.org TWO WEEKS before your scheduled visit in order for your payment to apply to one (1) future visit. Any additional future changes in bookings will require rebooking and a new 50% deposit. Cancellations can not be accepted after the two week deadline and require full payment.

SPECIAL NEEDS
Please let the Reservations Department know if you are bringing anyone with special needs in need of specific accommodations.

MEMBERSHIP
Dallas Arboretum membership or complimentary tickets are not valid for participants in scheduled educational field trips, unless specifically advertised on our website.

CHAPERONES/ADULTS
Schools are required to maintain the 1:8 adult to student ratio at all times, with those teachers/chaperones receiving free admission. All teachers are counted towards this ratio.

Additional adults added at the time of booking will receive the discounted rate of $15, including Children's Adventure Garden admission.

Otherwise, additional adults showing up the day of the field trip will be required to pay normal admission prices and may not be able to attend scheduled programs due to space limitations. Participants traveling in non-school vehicles to the Arboretum will be subject to parking policies and fees. Parking discounts may be available online.

SIBLINGS/STROLLERS
Education experiences are only open to school children included in the group reservation. Siblings and strollers should not be brought with chaperones and may be refused entry to educational programs.

### FESTIVALS

**AUTUMN AT THE ARBORETUM: A FALL FAIRY TALE**
**SEPTEMBER 17–OCTOBER 31**
*Presented by Reliant*

Over 100,000 pumpkins, gourds and squash come together to form the nationally acclaimed Pumpkin Village featuring A Fall Fairy Tale.

**DALLAS BLOOMS:**
**FEBRUARY 25–APRIL 16**

You haven’t experienced spring in Dallas until you’ve seen our 500,000 blooming bulbs and themed topiaries. Our show of color is like nothing you’ve seen before!

**BLACK HERITAGE CELEBRATION**
**MAY 6–7**

Join us for our annual celebration of black culture featuring music, fashion, art, food and black-owned businesses.
**Financial Aid**

The Arboretum offers financial assistance of up to 50% off for Title I schools booking Arboretum teacher-led educational programming. Financial aid requests must be made at the time a field trip request is submitted to be considered for financial aid. Financial aid requests submitted after a field trip has been approved will not be honored. In addition, the Arboretum has limited funds to offer a $100 bus stipend for Title I campuses that will be paid upon completion of your field trip. Field trips must be paid in full before receiving a bus stipend.

**Thanks to Our Friends**

The Dallas Arboretum's education programs have been made possible by the generous support of our 2022-2023 Education Partners:
