

**Dear Chaperone: Use these activities to add focus and fun as you guide your students around Rory Meyers Children's Adventure Garden.**

**Living things have basic needs and produce offspring.  
See if you can spot these living things throughout the garden:**

A plant that is:

**Large**

Small

**Red**

**Purple**

A plant that you eat.

What part of the plant do you eat:

Roots, Stem, Flower, Fruit or Seeds?

A plant that is taller than you.

Do you have the same needs as a plant?

A plant that is growing fruit.

How does the plant change during its life cycle?

A small animal with fur, big eyes,  
and a long bushy tail.

Where do you think it lives?

What do you think it eats?

An animal with feathers and a beak.

Where do you think it lives?

What do you think it eats?

An insect that buzzes around the garden  
and bringing pollen from flower to flower.

How do bees help plants?

Do bees communicate?

Identify or label the parts of the plant:  
Roots, Stem, Leaves, Flower, Fruit

Can you find these parts on a plant in the garden?

Identify or label the parts of the butterfly:  
Wings, Legs, Head, Antenna

How many insects can you find in the garden?

**Nonliving things are just as important as living things! Can you spot these non-living things?**

**White Rock Lake is home to many plants and animals.  
Check out our observation tower for a great view.  
What living and non-living things do you observe?**
